

Amendments to the Specification

Please amend the specification by inserting the following paragraph immediately after paragraph [0035] and immediately before paragraph [0036] of the published application (i.e., U.S. Publication No. 2004/0209852).

In another alternate embodiment, the formulation of the present invention is an aqueous suspension comprising about 0.005% to about 5%, or about 0.01% to about 2.5%, or about 0.01% to about 0.2%, or about 0.01% to about 0.1%, or about 0.1% to about 0.75% by weight of a drug substance. In a preferred embodiment, the formulation is an aqueous suspension comprising about 0.025% to about 1.0% of a drug substance, wherein the drug substance is preferably fluticasone. Even more preferably, the formulation is an aqueous suspension comprising about 0.04% to about 0.06% by weight of a drug substance wherein the drug substance is preferably fluticasone propionate. In a preferred embodiment, the formulation of the present invention is an aqueous suspension comprising about 0.045% by weight of fluticasone propionate, wherein the fluticasone propionate has the following particle size distribution profiles disclosed herein.
